Core philosophy & scientific Thinking

* Reflection on Deep Thought Philosophy ⇒
- Alignment in key :- Work shouldn't feel like a burden. If my personal goals align with the organization's philosophy (like the Nestle/ Nutrition example), growth happens naturally.

- The "A1 Quality Donkeys" Problem :- Most Indian Colleges focus on "Lower Aims of Learning" (placements & livelihood).
  1) Observation = Watching what's happening
  2) Hypothesis
  3) Experiment

- Case study - The samosa example :- If you make a unique, hygienic product but sell it like a commodity without explaining the uniqueness, the customer will switch to a competitor for even a ₹1 discount. Execution is about communicating and ~~deliver~~ dilivering that uniqueness.

Wealth Creation & Business Execution

* Scientific Execution & Economics ⇒

- The Execution Gap :- Companies are good at R & d (product design) but fail in operations, sales, and logistics.

- Innovation :- Wealth = "Regular panipuri = 10 % profit.
  - Chocolate panipuri (Innovation) = 33% profit
  - Innovation reduces competition and increases margins, allowing for reinvestment.

- Geopolitics of Wealth = Jharkhand has resources but low income, Telangana has fewer resources but higher wealth due to processes.

- PDGMS (People Development & Growth Management System) :- DT's AI platform that codifies business processes.
  - Example = Indigo Airlines.

Culture, Rituals & the Selection Process

* Building Institutions & Virtual Tour ⇒
- Institution Building :- Creating an organization that functions perfectly even if the leader is absent.

- Systems + Culture = ↳ Systems = The Science / Process part (MC Donald's systems are so strong anyone can make a burger).
  ↳ Culture = The Art / Habit part (The handshake after a match or the respect in Old South Indian Hostels).

- Power of Rituals :- Culture is shaped by rituals (Rakhi, fasting, handshakes). In DT, rituals like "Stand up meetings" drive execution.

- The Selection ~~pow~~ process (Virtual Tour) :-
  1) Thread builder
  2) Rigor builder

SCIENTFIC EXECUTION [PDGMS]

- Scientific Thinking
  - observation
  - Hypothesis (The Guess)
  - Experiment (Testing)
  - Samosa (case study)
- INStitution Building
  - Systems (Process)
  - Culture (Habits)
  - Rituals (Rituals like Handshakes)
  - Scaling Up
- Virtual Tour
  - Thread Builder (Mindful Listening)
  - Rigor Builder (challenge Reasoning)
  - Self - Gratitude
  - Journaling
- Wealth Creation
  - Innovation
  - Geopolitics of wealth (JharKhand vs Telangana)
  - Higher margins
  - Process Efficiency
